

KCG COLLEGE OF TECHNOLOGY

Department of Computer Science and Engineering

Assignment 2

Topic : Temperature_and_Humidity_sensing_alarm

Name: Ranjan Joseph Arunkumar

Code:-

```
import random as r
import time as t
while(True):
    t.sleep(2)
    a=r.randint(10,100)
    b=r.randint(10,100)
    if(a>35 and b>60):
        print("Temperature : {0} and humidity : {1}. Alarm is ON".format(a,b))
    elif(a<35 and b<60):
        print("Temperature : {0} and humidity : {1}. Alarm is OFF".format(a,b))
```

OUTPUT:-

The screenshot shows a web browser window with the URL `programiz.com/python-programming/online-compiler/`. The page features the Programiz logo and a link to an "Interactive Python Course". The main area displays a Python code editor with a file named `main.py`. The code is as follows:

```
1 import random
2 import time as t
3 while(True):
4     t.sleep(2)
5     a=random.randint(10,100)
6     b=random.randint(10,100)
7     if(a>35 and b>60):
8         print("Temperature : {0} and humidity : {1}. Alarm is ON"
9             .format(a,b))
10    elif(a<35 and b<60):
11        print("Temperature : {0} and humidity : {1}. Alarm is OFF"
12            .format(a,b))
```

To the right of the code editor is a "Shell" window showing the output of the program. The output consists of five lines of text, each representing a random check:

```
Temperature : 33 and humidity : 26. Alarm is OFF
Temperature : 19 and humidity : 29. Alarm is OFF
Temperature : 89 and humidity : 88. Alarm is ON
Temperature : 95 and humidity : 70. Alarm is ON
Temperature : 49 and humidity : 89. Alarm is ON
```
